***Examiner's Amendment and Statement of Reason(s) for Allowance***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Richard J. Gregson on February 18, 2008.

The application has been amended as follows:

**In the Specification:**

At page 1, following the title insert the following paragraph:

**CROSS-REFERENCE TO RELATED APPLICATIONS**

The present application claims the benefit of provisional application No. 60/197,704, filed April 18, 2000. The content of aforementioned application is fully incorporated by reference.

**In the Claims:**

**Claim 56**

At line 3, before "operator" delete "the" and insert – an --.

**Claim 75**

At line 7, before "monitoring station" delete "the" and insert – a --.

***Examiner's Statement of Reasons for Allowance***

2. Claims 34-88, now re-numbered as 1-55, are allowed.
3. The following is an examiner's statement of reasons for allowance.

The prior art of record, i.e., U.S. Patent No. 5,568,385 to Shelton and U.S. Patent No. 5,982,456 to Smith, Jr. et al. ("Smith") now made of record, taken singly or in combination, fail to teach or suggest a system and method for integrating weather data into television broadcast comprising, *inter alia*, the following features which are to be considered in combination with the remaining features of the respective independent claim:

*means for converting the icon signals into television signals representing the weather parameters, the television signals being in a format suitable for integration into the television broadcast signals (in claims 34, 61 and 75);*

*production switching means for receiving the television signals representing the weather parameters and the television broadcast signals, and for combining the television signals representing the weather parameters and the television broadcast signals so that first icon signals representing first weather parameter signals sensed at a first geographic location are combined with first television broadcast signals from the first geographic location, and so that second icon signals representing second weather parameter signals sensed at a second geographic location different from the first geographic location are combined with second television broadcast signals from the second geographic location (in claims 34 and 75 – recited in the language of a method claim);*

*means coupled with the production switching means for selecting an output television signal corresponding to either the first icon signals representing the first weather parameter signals sensed at the first geographic location combined with the first television broadcast signals from the first geographic location or the second icon signals representing the second weather parameter signals sensed*

*at the second geographic location combined with the second television broadcast signals from the second geographic location (in claims 34 and 75 – recited in the language of a method claim);*

*wherein the monitoring station includes a microcontroller coupled to receive the weather parameter signals from the sensing means, and wherein the microcontroller includes means for sampling the weather parameter signals generated by the sensing means, and interrupt logic for servicing interrupts generated by the sampling means (in claim 61).*

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang-Vu “Antony” Nguyen-Ba whose telephone number is (571) 272-3701. The examiner can normally be reached on Tuesday-Friday from 7:00 am to 5:30 pm.

If attempts to reach the examiner are unsuccessful, the examiner’s supervisor, John Miller can be reached at (571) 272-7353.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application should be directed to the TC 2600 Group receptionist (571) 272-2600.
